PROFESSIONAL SUMMARY

Hi, it's Tanzim, Front-End WordPress Developer with strong SEO expertise. I build fast, responsive, and accessible websites from Figma using HTML5, CSS3, JavaScript, and modern frameworks like Webflow. Skilled in Semantic SEO, I create structured, search-optimised content that drives visibility and aligns with user intent. I bridge design and functionality to deliver seamless, high-performing web experiences.

Skills

- Front-end Development:** HTML5, CSS3, JavaScript (ES6+), jQuery, TailwindCSS, Bootstrap, Elementor Expert
- Backend / CMS:** WordPress, Webflow, WooCommerce, PHP (basic/moderate), ACF, Node js, Express js, Payment integration
- Web Design:** UI Design, Landing Page Design, Website Design
- SEO:** Semantic On-Page SEO, Topical Authority Building, Holistic SEO Approach
- Shopify:** Shopify Product Research and Listing, Store Management and Customer Support Assistant.

Work Experience

1. Synster Platform LLC

Front-End Developer
Aug 2023 - May 2025

- Revamped page layouts and updated typography to create a cleaner, more modern visual experience aligned with current UI standards
- Streamlined the registration flow by removing friction points, resulting in a smoother onboarding process & reduced user drop-off
- Enhanced the contact form with additional fields and improved structure to encourage higher engagement and meaningful client inquiries
- Strengthened overall usability by refining navigation, clarity, and trust-building design elements throughout the platform

2. How To Discuss (Forum Site)

On-Page SEO & Content Writing (HowToDiscuss.com)
Oct 2021 - May 2023

- Wrote 100+ SEO-optimized articles within a year
- Achieved 20+ articles ranked at #1 on Google
- Ranked 50+ articles in the Top 5, resulting in 80% of content appearing on Page 1
- Conducted thorough keyword research and competitor analysis to guide content strategy
- Created informative, structured, and highly readable content tailored to diverse search intents

3. Zikora | UK Shoes (Shopify)

Product Listings & Performance Enhancement
Oct 2024 - Feb 2025

- Published 5–10 optimized product listings daily, ensuring accurate details, clear descriptions, and engaging visuals
- Improved product page performance by refining SEO metadata, enhancing layout structure, and Identified opportunities to strengthen overall site performance, including speed improvements, app management, and UX adjustments
- Ensured product pages were consistent, informative, and aligned with brand standards to build trust and boost conversions
- Monitored store functionality regularly to maintain a smooth and user-friendly shopping experience

1. Gold IRA For You

Tech Stack Used: WordPress, Elementor Free, Hostinger LiteSpeed Hosting

Plugins: Hello Elementor Theme, Rank Math SEO, LiteSpeed Cache, ASE (Advanced Scripts & Elements)

[Visit The Live Site →](#)

Built a comprehensive affiliate review platform for Gold IRA companies, helping retirement investors (ages 50–70) make informed decisions when diversifying into precious metals. The site combines editorial integrity with conversion-focused design, positioning itself as an independent, education-first resource rather than a sales funnel.

Key Contributions:

- Designed and developed a complete 5-company comparison and review system using Elementor Free, working around platform limitations with custom CSS solutions
- Built a consistent design system (forest green, gold, cream palette with Playfair Display + Inter typography) for visual trust and credibility
- Engineered custom interactive components (accordions, comparison tables, responsive cards) via custom HTML/CSS to extend beyond Elementor Free's native capabilities
- Configured Rank Math SEO with schema markup, sitemaps, and keyword-optimized meta content for organic search visibility
- Solved complex CSS specificity conflicts to maintain consistent border and color theming sitewide despite theme/builder limitations
- Implemented fully responsive layouts tested across desktop, tablet, and mobile viewports

2. Richmond Denture & Implant Centre

Tech Stack Used: Webflow, Custom JavaScript, Google Maps API

Tools: Webflow CMS, Webflow Variables, Custom Code Embeds

[Visit The Live Site →](#)

Developed a conversion focused, content heavy website for a dental implant and denture clinic, built to guide patients through a multi step decision journey with clarity and trust at every stage.

Key Contributions:

- Built a custom design system in Webflow using variables for consistent typography, color, and spacing across the entire site
- Designed and developed interactive sections including sticky scroll panels, a smooth animated accordion for FAQs and service details, and a custom draggable before and after image slider
- Structured content heavy service and resource pages for easy navigation, keeping long form patient information clear and digestible
- Ensured cross browser and cross device compatibility, with particular attention to mobile responsiveness given the personal, research heavy nature of the decision
- Implemented custom JavaScript solutions where Webflow's native components fell short, including smooth height animations and an interactive image comparison tool
- Optimized site structure and image handling for fast load times despite the volume of content
- Integrated a styled Google Maps embed and clear calls to action to support the booking and inquiry process

3. Medicology Health

Tech Stack Used: WordPress (CMS), Elementor (Page Builder), Custom JavaScript, Custom CSS, HTML5, Figma

Plugins: Elementor Pro, WooCommerce, Ultimate Addons, LiteSpeed Cache, Fluent Forms, UpDraftPlus, RankMath.

[Visit The Live Site →](#)

Developed a high-performance, conversion-focused weight loss website using WordPress and Elementor, enhanced with custom JavaScript and CSS for interactive layouts and seamless user experience. Focused on speed, engagement, and intuitive navigation with reusable templates and optimized responsive design.

Key Contributions:

- Built dynamic, interactive UI elements with custom JavaScript
- Developed optimized, responsive layouts for fast load times
- Created reusable Elementor templates to streamline future updates
- Implemented custom CSS for unique functional sections and polished styling
- Ensured a user-friendly, conversion-focused structure across all pages
